turn decisions (route turns >= 20 deg in 40 m)
straight decisions (< 5 deg)
reconstructed frames, probe (decision 275, held AlpaSim)
(a) same probe on real frames, same 16 logs
(b) probe trained on navtrain, all navtest
(b) on the same 16 logs
blind floor (navtrain, ego + command)
ego-lane boundary error at 20 m, median (m)
